

HARDIGG ROTATIONALLY MOULDED CONTAINER

AL3834-1617

Hardigg's single-lid cases ensure that even the most delicate equipment reaches its destination intact and unharmed. Constructed of high-performance resin, they are lightweight, impervious to dust and water, and virtually indestructible—and many are designed to meet strict MIL-SPEC shipping regulations and exceed ATA Spec 300 Category 1 standards. From laptop computers to jet engines, if your equipment requires exceptional protection against mechanical shock, vibration, and extreme environmental conditions – or needs complex foam cushioning or other custom features – a Hardigg case from Aerolyte is your solution.

All single-lid cases feature:

- Molded-in, tongue-in-groove gasketed parting lines for splash resistance and tight seals, even after impact.
- Reinforced corners and edges for additional impact protection.
- Hardigg's patented Comfort Grip Handles.
- Recessed hardware for extra protection.
- Positive anti-shear locks, which prevent lid separation after impact, and reduce stress on hardware.
- Molded-in ribs and corrugations for secure, non-slip stacking, columnar strength, and added protection.
- Permanent, uniform, molded-in color that won't scrape off.
- Patented molded-in metal inserts for catch and hinge attachment points, which provide strength and spread loads to the container walls.
- One-piece construction, molded from lightweight, high-impact polyethylene.

External Dimensions: 438 x 1044 x 943mm

Weight: 39.2kg
